8. Tropical Greenhouse
9. Edible Plant Garden

## Amenities

- a. Gift Shop
- b. Picnic Area
- c. Cafe

**P** Parking    **WC** Restrooms

## Lavender

Lavender is a fragrant perennial herb with narrow, gray-green foliage and spikes of small purple flowers. It typically grows to a height of 1 to 3 feet.

Lavender is commonly used for its aromatic foliage and flowers, which are prized for their fragrance and culinary uses. It is also used in herbal remedies, sachets, potpourri, and as a landscaping plant.

Kingdom: *Plantae* Order: *Lamiales* Family: *Lamiaceae* Genus: *Lavandula*

## Echeveria

Echeveria is a genus of rosette-forming succulent plants with thick, fleshy leaves arranged in symmetrical rosettes. They come in a variety of shapes, sizes, and colors, with some species producing offsets or "pups" around the base of the plant.

Echeverias are prized for their attractive foliage and ease of care, making them popular choices for container gardens, succulent arrangements, and rock gardens.

Kingdom: *Plantae* Order: *Saxifragales* Family: *Crassulaceae* Genus: *Echeveria*

## Lavender

*Lavandula angustifolia*

*Lamiaceae*

Origin: Mediterranean region

## Echeveria
